

# Laib Mohamed Issam

Software engineering student

+213561 31 17 80 · laibmohamedissam@univ-boumerdes.dz  
Haouch El Mekhfi, Ouled Heddadj, Boumerdes  
<https://www.iissam.site/>

## TECHNICAL SKILLS

Programming languages HTML, CSS, JavaScript, Java, JavaSwing, ElectronJS, ReactJS, C, SQL  
NextJS, VueJS, Python, TypeScript

## ACADEMIC OR PERSONAL PROJECTS

Project: Delegation Bot for Managing a University Department  
Description: Development of a Telegram bot acting as a department delegate. The bot automates the receipt and analysis of emails from instructors, automatically posts important announcements in the department's Telegram group, and stores the information in Google Sheets. This data then serves as the basis for answering student questions via private messages, thus enabling rapid communication.

Project: Full-stack e-commerce (NextJS + MySQL)  
Description: Creation of an online store with shopping cart, products, orders, admin interface, etc.  
Role: Full-stack development, MySQL database management, personal use.

Project: Other Miscellaneous Projects  
Description: Other personal and academic projects are available on my online portfolio:
